Glory-of-the-Snow

A mass planting forms one of the most sumptuous displays of floral beauty, a mass of blue and white, intense and brilliant. They bloom at the time of the Crocuses, producing dwarf flower spikes, bearing from 12 to 15 flowers of a sky-blue with a pure white heart, creating a lovely effect. They should be planted in the fall, 3 inches deep, about 18 bulbs to a square foot, in a sunny location or in half shade and in places where they can remain undisturbed for a number of years. The flowers will cross with one another and will seed themselves, forming natural colonies. All are 6 to 7 inches high, therefore excellent in the rockery as well.

Luciliae Doz. \$0.45, 100 \$2.75, 1000 \$25.00

Top size bulbs. Bright blue, white center. Flowers often with 6 to 8 blooms on each stem.

Sardensis Doz. \$0.50, 100 \$3.00, 1000 \$27.50

Top size bulbs. Same as above with true gentian-blue flowers.

Galanthus - Snowdrops

Nivalis Doz. \$0.60, 100 \$3.50, 1000 \$30.00

This is the old-fashioned favorite. Its lovely white nadding blooms are out before the frost is out of the ground; one of the lovely bulbs that tell us spring is almost here. A group naturalized in the shade of shrubs or under trees is worth while. Once planted they remain for a lifetime.

Muscari-Grape Hyacinths

Muscari are charming spring-flowering subjects. They can grow under trees and shrubs, and also do well in full sun in the border or at a sunny spot of the rockery, without any special attention. They are best planted immediately on receipt and can remain undisturbed for years. They are absolutely hardy and some varieties are delicately fragrant.

Armeniacum (Early Giant)

Doz. \$0.55, 100 \$3.25, 1000 \$30.00

Deep cobalt-blue flowers, producing many spikes with larger flowers than Heavenly Blue. Excellent for forcing and massing; wonderfully fragrant.

Botryoides coeruleum Doz. \$0.50, 100 \$3.00, 1000 \$25.00

Bright blue, very free-flowering at the time of the Crocuses. This is the common blue Grape Hyacinth and fine in the rockery. Foliage is more compact, is better for the rockery than Hyacinth Botryoides.

Botryoides album Doz. \$0.60, 100 \$3.50, 1000 \$30.00

This is the white form which is very pretty planted with the blue variety of this type.

Heavenly Blue Doz. \$0.45, 100 \$2.75, 1000 \$25.00

While there are several kinds of Muscari we consider this variety the best for mass planting. Their flowers open just about the time that the Crocuses are going. They do well in the wild garden and also in grass not too rank. They are nice under trees and along borders where they may be left undisturbed.

Scilla Campanulata

(Wood Hyacinths)

The English Blue Bells (*Scilla nutans*) with its long varieties (*S. hispanica*) has erect flower spikes and open campanulate flowers. All are very effective in flower and shrubbery borders, and most valuable for wild gardens and woodlands, where they should be largely naturalized. Wood Hyacinths may be planted in bare shady places and odd corners which often have a desert-like appearance which can thus be rendered bright and cheerful. They will also thrive under Fir and Pine trees, where few other plants will grow.

Hispanica (Campanulata)

Doz. \$0.55, 100 \$3.25, 1000 \$30.00

The Spanish Squill, blue.

Hispanica alba maxima

Doz. \$0.55, 100 \$3.25, 1000 \$30.00

Hispanica, Queen of the Pinks

Doz. \$0.70, 100 \$4.00

Deep pink, beautiful large spikes.

Hispanica, Skyblue

Doz. \$0.55, 100 \$3.25

Fine dark blue; late.

Scilla - Squill

The rich dark blue of *Scilla bifolia* and the bright blue of *Scilla sibirica* in early spring render them invaluable for edgings or for massing in flower beds and borders. As they bloom so early in the year, it is advisable to give them a sunny location. They are not particular about the soil in which they grow. They are ideal for the wild garden but they are not to be despised in the border, especially if they are left alone for two or three years without being disturbed in any way. They are splendid in the rock garden. Never plant less than 12 to 18 bulbs in a clump.

Sibirica (Siberian Squill)

Doz. \$0.65, 100 \$3.75, 1000 \$37.50

Earliest to flower, connecting the flower of the Crocuses with the Narcissi. Fine for naturalizing, producing drooping, bell-like flowers on stems three to four inches high. Succeeds well in the rock garden. Color bright blue. Plant 3 inches deep in shade, half shade or full sun. Giant bulbs are offered above.

Sibirica

Doz. \$0.55, 100 \$3.25, 1000 \$30.00

Large flowering size bulbs, No. 1 grade.

Hyacinths for Garden Planting

CAREFULLY CHOSEN NAMED VARIETIES IN DISTINCT COLORS

ALL FLOWERING AT ONE TIME

The two most satisfactory sizes of Hyacinth bulbs for garden planting are those bulbs which measure about 15 to 16 centimeters and a little larger size, measuring 17 to 18 centimeters. The most popular of the two is the smaller size, or the 15- to 16-centimeter bulbs, and rightly so. They are from 30 to 40 per cent cheaper and produce excellent and colorful effects. The spikes are not too heavy and they will not fall over when in full bloom. Planted in beds they make a cheerful display of color as soon as the snow goes, 4 to 6 weeks ahead of the

Darwin Tulips. Hyacinth bulbs measuring 17 to 18 centimeters give somewhat larger trusses and make a fine showing in the border and beds. They are also very satisfactory for forcing or indoor growing.

The varieties which we offer here for garden planting represent the best kinds for that purpose in their respective colors. They have strong stems, good clear colors, last a long time in bloom. The bulbs may be left in the ground and will give a good account of themselves for several years to come.

The pristine purity of this regal flower, the play of light on its balanced petalage, the graceful curve of the trumpet brim are unforgettable. An excellent grower. Easy to force, long-stemmed. Has no rival at the shows.

Mixed Daffodils for Naturalizing

The greatest and most effective use of Daffodils is to naturalize them in quantity in meadows and along the driveway, on the bank of the brook or among shrubbery.

By planting some bulbs on the south side and some others facing north, a long period of flowering, lasting well over a month, may be enjoyed.

Daffodils are the most prolific of flowers. If you plant a single bulb it will not be long in gathering a family, and in the course of two or three years the spot in which it grows will have become as populous as the tents of the patriarchs.

Planting mixed Daffodils is an investment that pays large dividends, **if the right varieties are used.**

The mixture presented by us is made up from named varieties and should, therefore, not be confused with other mixtures offered. This mixture is not grown as such, but varieties are selected that are especially adapted for naturalizing and will give an abundant and prolonged flowering period, increasing rapidly.

Mixed Daffodils, Standard and New Varieties

Doz. \$1.20, 100 \$8.00, 1000 \$75.00
